

[HAINING JIAMEIDA WARP KNITTING CO., LTD](#) was established in 2009, mainly engaged in sofa fabrics, curtain fabrics, warp knitting fabrics, and other textiles products with the manufacturing, processing, wholesale, retail, import and export business with all kinds of commodity and technology. Our company imported advanced high-speed warp knitting equipment and warp knitting machines from German Karl Mayer company. Under the concept of “quality first, customer supreme”, We have received the recognition and praise of customers with high-quality products, good credibility and excellent service. Our products are mainly exported to the United States, Canada, the United Kingdom, France, Turkey, Russia and many other countries and regions. With profound experience and scientific management, our company is developing steadily and rapidly.

### ***Advantage***

**Customization:** We have a strong R&D team, and we can develop and produce products according to the drawings or samples the customers offered.

**Cost:** We are an integrated factory which produces fabrics from knitting to bonding. So we can offer the price and products directly.

**Quality:** We will have inspection on all the fabrics to ensure the good quality.

**Multiformity:** We have different fabrics and crafts to satisfy the needs of customers.

**Capacity:** Our annual production capacity is over 10,000 tons, we can meet the needs of different customers with different purchase quantity.

**Service:** We are based on the high-end market, in line with international standards, mainly exported to Europe, America, Russia and other countries.

### ***Product advantages***

- 1) The comprehensive product line can be customized according to customers' samples
- 2) Advanced production equipment, 14 KARL MAYER warp knitting machines imported from Germany
- 3) On-time delivery capability, the error is within 1-3 days
- 4) Source factory, guaranteed price and quality
- 5) Products can pass OKO-TEX, British Standard, American Standard and other tests

# Sofa Fabric

## Burnout Fabric

### Burnout Velvet Fabric

Burnt-out is a process that uses two kinds of fibers with different acid resistance. After the printing and dyeing process, the burnt-out treatment is processed in an acid solution, so that the part of the fiber that is not acid-resistant is dissolved and rotten, and then, it comes to the burnt-out fabric. The main feature of the fabric is that it has a transparent, concave-convex pattern, a novel pattern and a clear outline. According to the difference in the fabrics we used, our products are divided into super soft burnt-out fabric, imitation super burnt-out fabric, Dutch velvet burnt-out fabric and so on. The height is usually 0.5 mm or 1 mm, and the weight is usually around 200 grams per square meter, which can be adjusted according to the needs of use.

## Solid Fabric

### Bright Jaguar fabric

Location: China  
Business Type: Manufacturer, Exporter  
Brands: OEM

Delivery time: 30days after confirmation of artwork and deposit  
Payment method: TT 30% deposit, balance against BL copy

The pressing gluing is generally a simple bronzing process that uses pressure and temperature to press glue and patterns on the cloth surface on a bronzing machine. Under normal circumstances, pressure glue is used in conjunction with bronzing film to make sofa fabrics or clothing fabrics more three-dimensional. It can be divided into transparent glue and color glue.
